SIGNALLING DEVICES

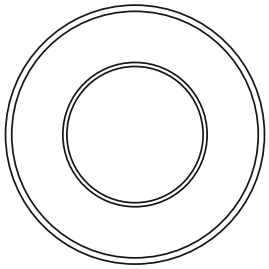
STATUS INDICATOR WZ 4

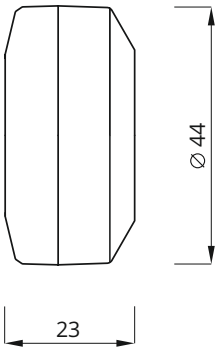
The WZ 4 status indicator is intended for optical repetition of the signalling alarming state of the detector or a group of detectors in the fire alarm systems. It can be added to the detector or a group of detectors. The indicator is applied when installed detector is invisible or there is limited access to a room supervised by detectors, for example, it is installed in spaces above ceiling, in cable passages, technical rooms, hotel rooms, etc.

Characteristics:

- Additional visual signalling
- Small dimensions
- 4 LED signalling diodes
- Consumption of current <4mA

Dimensions (mm):





TECHNICAL DATA	
Name	Status indicator WZ 4
Supply voltage	24 VDC ± 30%
Quiescent current	0 mA
Alarm current	<4 mA
Dimensions	Ø44 x 23 mm
Weight	18 g
Product code	FSS0000001
